

AMENDMENT TO THE CLAIMS

Claims 1-5. (canceled)

Claim 6. (currently amended) A system for communicating with a motorist, comprising:

a repository in which a vehicle is assigned an electronic address according to its license plate registration number; and

a messaging service that enables the motorist to be contacted ~~by other motorists or by land-based institutions or people~~ at the electronic address assigned to said license plate registration number.

Claim 7. (previously presented) The system of claim 6, wherein an algorithm coordinates a plurality of electronic addresses for each license plate registration number.

Claim 8. (previously presented) The system of claim 6, wherein the motorist can simultaneously communicate over each of said plurality of electronic addresses.

Claim 9. (currently amended) A system for communicating with a motorist, comprising:

a repository in which a vehicle is assigned a wireless telephone address according to its license plate registration number; and

a wireless telephone service that enables the motorist to be contacted ~~by other motorists or by land-based institutions or people~~ at the telephone address assigned to said license plate registration number.

Claim 10. (previously presented) The system of claim 9, wherein said wireless telephone address comprises a cellular phone number.

Claim 11. (currently amended) The system of claim 6, wherein the electronic address is standardized for ~~all types of contacts~~ use with email, instant messaging, RFID, websites, or telephone communication.

Claim 12. (new) A method of providing communication to an electronic account, said method comprising:

establishing a database;

populating said database with license plate information;

creating an electronic account based on said license plate information; and

enabling said electronic account as a destination address for a plurality of communication

methods.

Claim 13. (new) The method of claim 12, wherein said communication method comprises email.

Claim 14. (new) The method of claim 12, wherein said communication method comprises instant messaging.

Claim 15. (new) The method of claim 12, wherein said communication method comprises static RFID transmission.

Claim 16. (new) The method of claim 12, wherein said communication method comprises telephone communication.

Claim 17. (new) The method of claim 16, wherein said communication method comprises VOIP.

Claim 18. (new) The method of claim 12, wherein said communication method comprises coded messages.

Claim 19. (new) The method of claim 12, wherein said communication method comprises a website.

Claim 20. (new) The method of claim 12, said step of creating an electronic account further comprising establishing a user profile.

Claim 21. (new) The method of claim 20, wherein said user profile comprises information selected from the group consisting of:

name;

age;

gender;

vehicle type; and

combinations of the above.

Claim 22. (new) The method of claim 12, wherein said license plate information comprises a registration number and state of issue.
